

ANTISTATIC BAR **ABSL-AK**

The antistatic bar ABSL-RC-AK is an antistatic bar coupled with an air knife. The air knife is an amplifier of air flow, in effect it amplifies the compressed air flow used from 30 to 40 times, in this way you have a big energy savings in electricity terms for compress air. In these air knives, air goes out from a slot of 0,05 mm and it's ideal for drying and cleaning of the surfaces, moreover, with antistatic bar coupling it eliminates electrostatic charges. The use of the antistatic bar ABSL-RC-AK finds various applications especially in plastic industry, graphic industry, painting industry, wood industry etc.

ABSL-AK	
Working distance	1000 mm
Lenght	From 75 mm to 4000 mm
Emitters	stainless steel
Operating voltage	7 KVAC
Power supply	AF2 - BEQ
Weight	3,5 kg / m
Operating temperature	0° C - 70° C
Pressure	Max 10 bar adjustable
Air connection	1/4"
Accessories	5 micron filter (compulsory)
