

CHARGE GENERATOR **ECG30**

ECG30 charge generator creates an adjustable high voltage between 0 to 30 KV and an also adjustable current between 0 and 3 mA. Its controls are very intuitive and thus easy to be used by the operator. Besides it can be remotely controlled by means of the remote control analogical function. It can have positive or negative charge on request and from 1 to 4 high voltage outputs.

ECG30	
Frame material	Powder coated steel
Weight	7 kg
Connections	From 1 to 4
Voltage reading	Digit display
Working temperature	0 - 60 °C
Primary voltage	24V DC/90-264 V AC 47/63 Hz
Energy consumption	100 Watt max.
Secondary output	0 - 30 kV DC
Secondary current	0 - 3 mA
Polarity	Positive or negative
Features	Voltage and current control, surcharge indicator, Remotely controlled analogical function, controls keyboard
