

ANTISTATIC BAR **ABSL-RC-AKM**

The antistatic bar **ABSL-RC-AKM** is an antistatic bar coupled with an air knife. The air knife is an amplifier of air flow. In fact, it amplifies the compressed air flow used from 30 to 40 times. This way you have big energy savings in electricity terms for compressed air. In these air knives, air goes out from a slot of 0.05 mm and it is ideal for drying and cleaning of the surfaces. Moreover, with antistatic bar coupling it eliminates electrostatic charges. The use of the antistatic bar **ABSL-RC-AKM** finds various applications especially in plastic industry, graphic industry, painting industry, wood industry etc.

ABSL-RC-AKM	
Working distance	20 - 1500 mm
Operating voltage	7000 VAC
Power supply	AF2WR - AF4WR - APS2 - APS4
Weight	3.5 kg / m
Machine maximum speed	500 m / min
Ambient temperature	0° C - 70° C
Pressure	Max. 10 bar adjustable
Air connection	1/4"
Lengths	from 100 mm to 4000 mm
Accessories	5-micron filter (compulsory)
