

CHARGING GENERATOR Mini Easy Charge

The **Mini Easy Charge** charging generator generates high tension adjustable between 0 and 20 KV with signal 0-20 mA. The generator has positive or negative polarity upon request, and 2 high-tension outputs. A splitter having min. 2 max. 8 nozzles is available to be positioned on the high-tension output.

MINI EASY CHARGE	
Frame material	ABS
Weight	560 gr
Connections	2
Operating temperature	0 - 60 °C
Primary voltage	24V DC -1.5 A max.
Energy consumption	30 Watt max.
Secondary output	0 - 20 kV DC
Secondary current	Max. 0.8 mA
Polarity	Positive or negative
Features	Voltage control, overload indicator ON/OFF with remote control
